

Russell Dudek - Director of Operations

POSITIONING

Operations leader who converts strategy into lightweight mechanisms across AI, product, data, technical delivery, finance, and organizational capacity.

FOUNDATION DATA FIT

- COO extension: translate priorities into visible roadmaps, owners, dependencies, risks, and decisions.
- Revenue discipline: connect technical capacity to scalable customer and margin outcomes.
- AI-enabled efficiency: redesign work around context, human authority, adoption, evaluation, and measurable capacity release.

VERIFIED EXPERIENCE

- Amazon: launched and scaled operations, customer mechanisms, logistics systems, automation, and cross-functional programs.
- Vape-Jet: scaled an acquired manufacturing startup, standardized operations, implemented Odoo, quality systems, purchasing, logistics, and a second-location operating model.
- ZeusVu and AI advisory work: built data, optimization, computer-vision, and AI-enabled operating systems across technical and business stakeholders.

Mechanisms before meetings

OPERATING METHODS

- Lean, Six Sigma, Gemba, process mapping, standard work, KPI design, forecast discipline, portfolio prioritization, and executive reporting.
- AWS, Bedrock, SageMaker, Firebase, Google Cloud, route optimization, RAG, AI guardrails, React, data products, and automation.

TRANSFERABLE ADVANTAGE

- Comfort managing technical teams without pretending to be the engineer.
- Strong customer-backward judgment from Amazon and startup operating environments.
- Physical chemistry and semiconductor background that supports credible work across data, engineering, product, quality, and commercial teams.

LEADERSHIP

Servant leader with a high standards bar: clarify the work, earn context, surface risk early, and make accountability usable rather than bureaucratic.
