

A decision meeting, not a status meeting

45-MINUTE AGENDA

- 0-5: confirm company priorities and changed assumptions.
- 5-15: set portfolio posture - accelerate, sequence, repair, stop.
- 15-30: resolve aged blockers and dependencies.
- 30-38: review economics, capacity, repeatability, rework, and support load.
- 38-43: review trust evidence for Scout, tagging, and analytics.
- 43-45: record decisions, owners, dates, and evidence needed.

MEETING HYGIENE

- No status narration that can be read asynchronously.
- No metric without owner, unit, baseline, and decision use.
- No blocker without owner, next action, and escalation date.

One page per strategic initiative

REQUIRED FIELDS

- Decision improved.
- Economic load.
- Accountable owner and decision rights.
- Capacity and dependency load.
- Trust conditions and human authority.
- Leading evidence.
- Current posture and next decision date.

DECISION RECORD

For each change: date, decision, owner, evidence or assumption, expected consequence, and review date.

AI STANDARD

No AI pilot without a process owner, human authority, evaluation, adoption plan, exception path, and capacity-redeployment hypothesis.

USE

Apply the same compact contract to Scout, tagging expansion, scalable analytics offers, marketing priorities, and internal AI initiatives.
